

TRIVIA QUESTIONS

October 23, 2025

BLANK

Where can gluons be found freely existing in bulk?

- Light Waves.
- Quark-Gluon Plasma.
- Vacuum of space
- Inside electrons

BLANK

Where can gluons be found freely existing in bulk?

- Light Waves.
- **Quark-Gluon Plasma.**
- Vacuum of space
- Inside electrons

BLANK

Who first predicted the existence of antimatter?

- Albert Einstein
- Carl D. Anderson
- Paul Dirac
- Werner Heisenberg

BLANK

Who first predicted the existence of antimatter?

- Albert Einstein
- Carl D. Anderson
- **Paul Dirac**
- Werner Heisenberg

BLANK

What was the observed effect that led to the first experimental verification of General Relativity?

- Gravitational redshift of starlight
- Perihelion precession of Mercury
- Bending of starlight during a solar eclipse
- Gravitational time dilation near massive bodies

BLANK

What was the observed effect that led to the first experimental verification of General Relativity?

- Gravitational redshift of starlight
- Perihelion precession of Mercury
- **Bending of starlight during a solar eclipse**
- Gravitational time dilation near massive bodies

BLANK

In Iron Man, Tony Stark's "arc reactor" would ideally rely on which process for maximum energy yield?

- Chemical combustion
- Nuclear Fission
- Nuclear Fusion
- Beta decay

BLANK

In Iron Man, Tony Stark's "arc reactor" would ideally rely on which process for maximum energy yield?

- Chemical combustion
- Nuclear Fission
- **Nuclear Fusion**
- Beta decay

BLANK

Why are lightsabers impossible?

- Photons don't interact or stop
- They use too much energy
- Too hot
- No plasma confinement

BLANK

Why are lightsabers impossible?

- **Photons don't interact or stop**
- They use too much energy
- Too hot
- No plasma confinement

BLANK

The accidental discovery of radioactivity was made by:

- Marie Curie
- Henri Becquerel
- James Chadwick
- Enrico Fermi

BLANK

The accidental discovery of radioactivity was made by:

- Marie Curie
- **Henri Becquerel**
- James Chadwick
- Enrico Fermi

BLANK

Which discovery led to the formulation of quantum electrodynamics (QED)?

- Blackbody radiation
- Photoelectric effect
- Electron–positron scattering and self-energy corrections
- Pair production

BLANK

Which discovery led to the formulation of quantum electrodynamics (QED)?

- Blackbody radiation
- Photoelectric effect
- **Electron–positron scattering and self-energy corrections**
- Pair production

BLANK

The bending of light around massive bodies was first confirmed during:

- The lunar eclipse of 1900
- Michelson's ether drift experiment
- The solar eclipse of 1919
- The launch of the Hubble Telescope

BLANK

The bending of light around massive bodies was first confirmed during:

- The lunar eclipse of 1900
- Michelson's ether drift experiment
- **The solar eclipse of 1919**
- The launch of the Hubble Telescope

BLANK

Which effect demonstrates that photons carry momentum?

- Compton effect
- Photoelectric effect
- Doppler effect
- Bremsstrahlung

BLANK

Which effect demonstrates that photons carry momentum?

- **Compton effect**
- Photoelectric effect
- Doppler effect
- Bremsstrahlung

BLANK

The Josephson effect involves:

- Superfluid helium flow
- Quantum tunnelling of Cooper pairs between superconductors
- Laser coherence
- Hall voltage generation

BLANK

The Josephson effect involves:

- Superfluid helium flow
- **Quantum tunnelling of Cooper pairs between superconductors**
- Laser coherence
- Hall voltage generation

BLANK

In December 2024, Google QuantumAI announced its “Willow” chipset. What key milestone was claimed for this 105-qubit processor?

- It performed chemical simulations of a full protein
- It solved a random-circuit sampling task in under 5 minutes that a classical supercomputer would take 10^{25} years to match.
- It achieved zero error rates for 2-qubit gates
- It was cooled to room temperature

BLANK

In December 2024, Google QuantumAI announced its “Willow” chipset. What key milestone was claimed for this 105-qubit processor?

- It performed chemical simulations of a full protein
- **It solved a random-circuit sampling task in under 5 minutes that a classical supercomputer would take 10^{25} years to match.**
- It achieved zero error rates for 2-qubit gates
- It was cooled to room temperature

BLANK

In 2020, physicists created a room-temperature superconductor for the first time. What element was crucial in this high-pressure compound?

- Oxygen
- Hydrogen
- Sulfur
- Carbon

BLANK

In 2020, physicists created a room-temperature superconductor for the first time. What element was crucial in this high-pressure compound?

- Oxygen
- **Hydrogen**
- Sulfur
- Carbon

BLANK

In 2022, a new phase of matter known as a “time crystal” was realized on Google’s quantum processor. What unique property defines a time crystal?

- Perfect thermal equilibrium
- Quantum tunnelling through time barriers
- Periodic motion in its ground state without energy input
- Stable energy at negative temperatures

BLANK

In 2022, a new phase of matter known as a “time crystal” was realized on Google’s quantum processor. What unique property defines a time crystal?

- Perfect thermal equilibrium
- Quantum tunnelling through time barriers
- **Periodic motion in its ground state without energy input**
- Stable energy at negative temperatures

BLANK

The 2021 Nobel Prize in Physics was awarded for work on complex systems. Which phenomenon was part of that recognition?

- Quantum entanglement
- Higgs boson discovery
- Superconductivity
- Climate modelling and atmospheric turbulence

BLANK

The 2021 Nobel Prize in Physics was awarded for work on complex systems. Which phenomenon was part of that recognition?

- Quantum entanglement
- Higgs boson discovery
- Superconductivity
- **Climate modelling and atmospheric turbulence**

BLANK

Which astronomical observation provided the first indirect evidence for the existence of dark matter?

- Type Ia supernova brightness variations
- Flat rotation curves of galaxies
- Gravitational wave interferometry
- Big Bang nucleosynthesis abundances

BLANK

Which astronomical observation provided the first indirect evidence for the existence of dark matter?

- Type Ia supernova brightness variations
- **Flat rotation curves of galaxies**
- Gravitational wave interferometry
- Big Bang nucleosynthesis abundances

BLANK

The 2014 Nobel Prize in Physics was awarded for a discovery that revolutionized lighting technology. Which breakthrough in semiconductor physics enabled the development of efficient white LED lighting?

- Quantum well laser diodes
- Infrared light-emitting diodes
- Blue gallium nitride (GaN) light-emitting diodes
- Organic light-emitting diodes (OLEDs)

BLANK

The 2014 Nobel Prize in Physics was awarded for a discovery that revolutionized lighting technology. Which breakthrough in semiconductor physics enabled the development of efficient white LED lighting?

- Quantum well laser diodes
- Infrared light-emitting diodes
- **Blue gallium nitride (GaN) light-emitting diodes**
- Organic light-emitting diodes (OLEDs)

BLANK

What unique property of graphene makes it exhibit extremely high electron mobility?

- Its two-dimensional honeycomb lattice structure
- Its strong spin-orbit interaction
- Its superconducting transition temperature
- Its large atomic mass and density

BLANK

What unique property of graphene makes it exhibit extremely high electron mobility?

- **Its two-dimensional honeycomb lattice structure**
- Its strong spin-orbit interaction
- Its superconducting transition temperature
- Its large atomic mass and density

BLANK

What fundamental mechanism gives mass to elementary particles in the Standard Model?

- Electroweak symmetry breaking through photon exchange
- Spontaneous symmetry breaking mediated by the Higgs field
- Quantum tunneling of gluons
- Spin-orbit coupling in weak interactions

BLANK

What fundamental mechanism gives mass to elementary particles in the Standard Model?

- Electroweak symmetry breaking through photon exchange
- **Spontaneous symmetry breaking mediated by the Higgs field**
- Quantum tunneling of gluons
- Spin-orbit coupling in weak interactions

BLANK

During the epoch of reionization, what was primarily responsible for reionizing the neutral hydrogen that filled the early Universe?

- Supernova shock waves
- Ultraviolet radiation from the first stars and galaxies
- Cosmic microwave background photons
- Cosmic rays from active galactic nuclei

BLANK

During the epoch of reionization, what was primarily responsible for reionizing the neutral hydrogen that filled the early Universe?

- Supernova shock waves
- **Ultraviolet radiation from the first stars and galaxies**
- Cosmic microwave background photons
- Cosmic rays from active galactic nuclei

BLANK

Which type of astrophysical event produced the first directly detected gravitational waves, a discovery that led to the 2017 Nobel Prize in Physics for the observation of gravitational waves?

- Supernova explosion
- Neutron star collapse
- Binary black hole merger
- Cosmic string vibration

BLANK

Which type of astrophysical event produced the first directly detected gravitational waves, a discovery that led to the 2017 Nobel Prize in Physics for the observation of gravitational waves?

- Supernova explosion
- Neutron star collapse
- **Binary black hole merger**
- Cosmic string vibration

BLANK

Which experiment demonstrated that electric charge is quantized, revealing the existence of a fundamental unit of charge carried by electrons?

- Thomson's cathode ray experiment
- Rutherford's gold-foil experiment
- Millikan's oil drop experiment
- Davisson–Germer experiment

BLANK

Which experiment demonstrated that electric charge is quantized, revealing the existence of a fundamental unit of charge carried by electrons?

- Thomson's cathode ray experiment
- Rutherford's gold-foil experiment
- **Millikan's oil drop experiment**
- Davisson–Germer experiment

BLANK

In 2023, researchers reported the first detection of what exotic quasiparticle in a solid-state system?

- Parafermions
- Majorana fermions
- Anyons
- Excitons

BLANK

In 2023, researchers reported the first detection of what exotic quasiparticle in a solid-state system?

- **Parafermions**
- Majorana fermions
- Anyons
- Excitons

BLANK

Who is known for pioneering ultrafast laser techniques leading to high-intensity pulses in 2018?

- Gérard Mourou and Donna Strickland
- Heino Falcke
- Peter Higgs
- Alain Aspect

BLANK

Who is known for pioneering ultrafast laser techniques leading to high-intensity pulses in 2018?

- **Gérard Mourou and Donna Strickland**
- Heino Falcke
- Peter Higgs
- Alain Aspect

BLANK

Which astronomical observation revealed that the universe's expansion is accelerating, a discovery that earned the 2011 Nobel Prize in Physics for its evidence of dark energy?

- Cosmic microwave background anisotropies
- Galaxy rotation curves
- Type Ia supernovae brightness–redshift measurements
- Large-scale structure clustering

BLANK

Which astronomical observation revealed that the universe's expansion is accelerating, a discovery that earned the 2011 Nobel Prize in Physics for its evidence of dark energy?

- Cosmic microwave background anisotropies
- Galaxy rotation curves
- **Type Ia supernovae brightness–redshift measurements**
- Large-scale structure clustering

BLANK

Which particle's discovery completed the experimental confirmation of the electroweak unification predicted by the Standard Model?

- Gluon
- Higgs boson
- Neutrino
- Top quark

BLANK

Which particle's discovery completed the experimental confirmation of the electroweak unification predicted by the Standard Model?

- Gluon
- **Higgs boson**
- Neutrino
- Top quark
